

OnePlace Product Lifecycle Management

OnePlace PLM delivers smart Product Lifecycle Management (PLM) with integrated document and process management, centralised capture of design information and supply chain collaboration in a web-based solution.

Accessed over the internet, OnePlace PLM is available 24 x 7 to integrate people, data, processes and business systems within the supply chain. It will deliver a reliable, cost-effective collaboration backbone for your operation and your extended enterprise.

OnePlace PLM incorporates a dynamic OnePlace Workflow tool to manage process scheduling and critical timelines. Developed using best-practice models of workflow and business processes, OnePlace will bring a new level of data control, organisation and efficiency to your business.

OnePlace PLM will strengthen your market position

In today's fast-moving business environment, all businesses must capitalise on their key market differentiators. Building on your existing strengths and introducing new, efficient business processes will not only strengthen your market position but it will also grow your profitability.

“ When we saw the capabilities of OnePlace PLM & Workflow, we knew this solution would help us greatly improve our operational efficiencies and deliver the highest level of service to our clients ... They (OnePlace) are able to implement this solution and get (us) trained in only one week - no one else can touch that in this market. ”

*Shalom Mizrahi, Owner
Mainstreet Loungewear*

What are **your** key differentiators in a crowded market?

Is it unique design?

Is it the ability to get your product out to market quickly?

Is it price?

Is it your partner network?

Is it customer service?

OnePlace PLM will build on all these strengths to give your products the competitive edge.

Unique design

Introducing new designs, finding and reusing product designs, getting the right design revision quickly, and just working on the same design revision in a collaborative work environment; these are all good reasons to implement OnePlace PLM. With centralised capture of design information and smart supply chain collaboration, OnePlace supports the development and design process from end-to-end.

Fast time to market

OnePlace uses milestone tracking to monitor your project's critical path with instant reporting using real-time data and colour-coding to highlight overdue tasks. You'll be able to identify potential bottlenecks via exception reporting and reassign work to meet deadlines. This interactive workflow will bring your product to market faster and more efficiently, saving you time, money and stress.

Partner network

OnePlace's Partner Portal released snapshots of documents for partner (supplier, customer, agent) collaboration. These snapshots allow partners to receive a range of information (technical, design, pricing) and enables them to take action on the information; to quote, join discussions and complete workflow tasks.

Price

Delivering a price-sensitive product to market requires efficient business processes to support the supply chain. OnePlace provides end-to-end visibility of your business process (including sampling and sourcing) and introduces, as standard, best practice workflows and processes. You'll have control of your processes and therefore your costs (for example - early detection and therefore elimination of non-profitable product development).

Customer Service

OnePlace PLM supports the delivery of exceptional customer service within the supply chain. With an interactive dashboard of priorities, OnePlace allows users to track the progress of individual tasks assigned to team members and external partners for a particular project. It's all in real-time, over the internet so it doesn't matter where your team or your partners are; everyone has visibility over the project and everyone is accountable. Everyone is also using reliable, timely data with a single version of the truth.

Benefits

- Real time reporting and information access
- Fast time to market
- New, best-practice work practices
- Control of product development (early intervention in inefficient development)
- Centralised product development
- End-to-end visibility over the entire process
- Supplier performance rating
- Deep partner collaboration

Sample Tracking, Quality Control and Quality Assurance – internal and external sample requests, sample tests and their tracking with individual vendor performance ratings.

OnePlace PLM

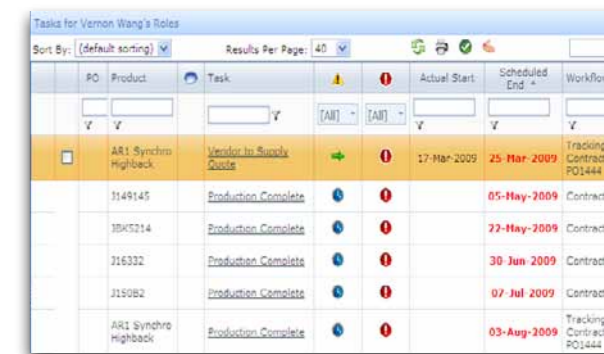

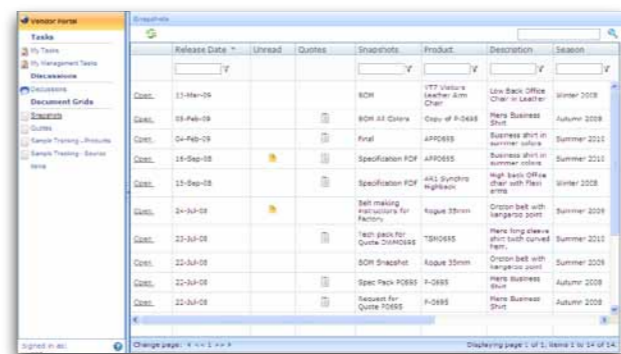

- View up-to-date information on current/previous products & prototypes
- Deliver consistent and reliable information through the use of templates
- Control information integrity via the approval process
- Centralise the management, distribution and access to information and design
- Control of product development
- Track change/history, reduce errors and reduce communication down-time

Key components of OnePlace PLM

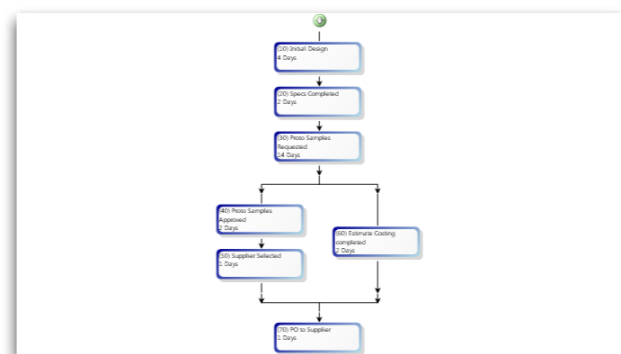

Line Planning – line creation including 'start of season' budget planning, such as Open to Buy (OTB), top-down product creation direct from the line plan.

Partner Portal – released snapshots of documents for partner (supplier, customer, agent) collaboration; snapshots include complete technical specification packs, any individual documents or requests for quotations; partners can quote, join discussions and complete workflow tasks.

Workflow and Tracking – template-driven design to map the critical path on an easy drag-and-drop designer tool; milestone tracking and extensive reporting with filters to provide a true management-by-exception environment.

OnePlace Workflow

OnePlace Workflow can be stand-alone or incorporated in OnePlace PLM. It schedules and manages business processes and projects, drives collaboration and accountability, and provides end-to-end visibility.

OnePlace Workflow allows users to track the progress of individual tasks assigned to team members and external Partners for a particular project. Operating in real-time, it provides everyone with 'one version of the truth'. Via 'My Tasks', users have an interactive dashboard of their priorities, through which they can drill down and complete necessary work. Via 'My Management Tasks', managers can quickly identify bottlenecks by exception and can re-assign work to meet deadlines.

Key components of OnePlace Workflow

Template designer – easy-to-use, visual drag-and-drop tool to create business process templates; individual user calendars; role-based or user-based tasks

Milestone Tracking – track a project's critical path via milestone reporting; instant real-time data; colour-coding to highlight overdue tasks

Integration of OnePlace PLM with In-House ERP solutions

OnePlace PLM can be readily integrated with existing in-house Enterprise Resource Planning (ERP) solutions or we can provide a fully integrated solution using Microsoft Dynamics NAV.

OnePlace provides XML export for style, colour, size, data for customers to import into their ERP solution or other systems.

Integration into ERP systems is built on the principles that data should only need to be entered once and automatically updated in the second system.

OnePlace and Eclipse

Your PLM Implementation Specialist

Delivering intelligent solutions with old-fashioned service

Formerly Just OnePlace, OnePlace by Eclipse is the next generation of internet-based, product lifecycle solutions. Built from the ground up, in Australia on 100% Microsoft technology, OnePlace is owned and implemented in Australia by Eclipse.

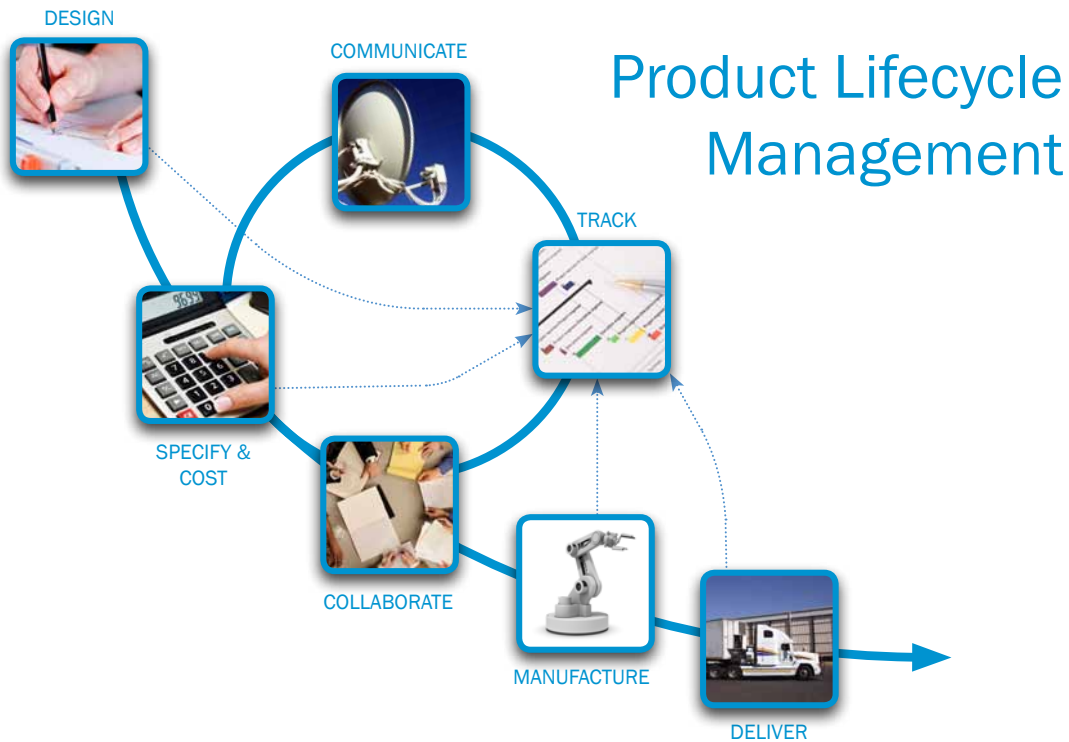

At Eclipse our philosophy is simple. We deliver the right solution with the highest levels of service. Doing this – we deliver success; success for your organisation and for ours.

Built from over a decade of industry experience, our OnePlace implementation methodology delivers a combination of consulting and configuration that is tailored specifically for the way you do business.

From project outset, our OnePlace consultants will ensure a cost-effective and flexible implementation plan that takes into consideration your internal resources and commitments to ensure your OnePlace solution delivers against budget, timeline and expectation.

Once your solution is implemented, we maintain a strong on-going business relationship, with 24 x 7 support and a range of value-added services to ensure your OnePlace remains reliable and effective in your business.

There is no secret to this success – it's all about providing intelligent solutions with our old-fashioned service.
